

## Cannabis Concentrate

We use a THC distillate in our products to provide the most consistent edible experience. We then use fruit derived terpenes to create the desired effect.

## Terpenes

Terpenes are the natural component to all fruits and plants. As an edible producer we choose to use food grade terpenes to deliver a consistent, palatable experience each time.

## Quick Activation Time

We have observed quicker than normal activation time with our edibles. We use sunflower lecithin as an ingredient, in combination with coconut oil, as it increases absorption of THC into the body. Some users will notice effects within 30 minutes.
